

and Environmental Control

PUBLIC NOTICE

Notice #01062-03 March 18, 2016

As required by Section 280.67 of the S.C. Underground Storage Tank Control Regulations (R.61-92), the S. C. Department of Health and Environmental Control (Agency) is taking public comments on a Corrective Action Plan (CAP). This CAP addresses the cleanup of soil and groundwater contamination at the facility listed below. The contamination was caused by petroleum products that were released from the underground storage tank (UST) system at this facility.

FACILITY: Building 621/ Station Fuels, MCAS Beaufort, SC.

APPLICANT: U.S. Army Corps of Engineers (USACE), Savannah District, 100 Oglethorpe Avenue, Savannah, GA on behalf of the U.S. Marine Corps.

SUMMARY OF CAP: Petroleum and petroleum byproducts naturally break down over time through chemical, physical, and biological processes. These processes are called natural attenuation. URS has submitted a CAP proposing the use of the following technologies in addition to natural attenuation to clean up the contamination.

 In-situ chemical oxidation (ISCO): Subsurface injection of oxygen- releasing compounds (ORC) to oxidize petroleum constituents and to enhance aerobic biodegradation.

PUBLIC COMMENT PERIOD DEADLINE: The **deadline** for submitting written comments is **5 PM**, **April 18**, **2016**. Any interested person(s) may submit written comments concerning the cleanup to the Project Manager listed below. Please bring this notice to the attention of persons whom you know will be interested in this matter. Where there is a significant degree of public interest, the Agency will hold a public hearing.

Joel P. Padgett, P.G. SCDHEC - UST Management Division 2600 Bull Street Columbia SC 29201 803-898-0655

CONTACT INFORMATION: For additional information, please call the Project Manager listed above. To view a copy of the CAP, contact the Agency's Freedom of Information Office at 803-898-3882.
